

40/4 VENEER

PRODUCT DESCRIPTION

SIMPLE, STACKABLE, REMARKABLE

David Rowland's award-winning 40/4 stackable chair is arguably one of the most important designs of the 20th century. The 40/4 chair is featured in design collections and museums the world over, in recognition of its elegant lines, excellent ergonomics, unsurpassed stacking and handling, as well as space-saving advantages for flexible interiors. With over eight million sold since its inception in 1964, the 40/4 stackable chair is an indisputable icon of multifunctional design, which continues to attract architects and designers who are amazed by its ability to create space - without taking up space.

ENVIRONMENTAL AMBITIONS AND HEALTHY DECISIONS

Taking a genuine interest in our surroundings is far more than just a noble idea. It is deeply ingrained in HOWE's strategic thinking. Our long-lasting, space-optimising and multi-usage furniture solutions means fewer resources needed; and thus fewer effects on the environment. Thus, our strategic thinking also contributes to the overall LEED-credit.

We have summarised this mindset in the concept 'GREENTHINKING' which constantly reminds us to act responsibly vis-à-vis our surroundings, be it our business partners or the natural world.

FEATURES

SUPPLIERS

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

VOC

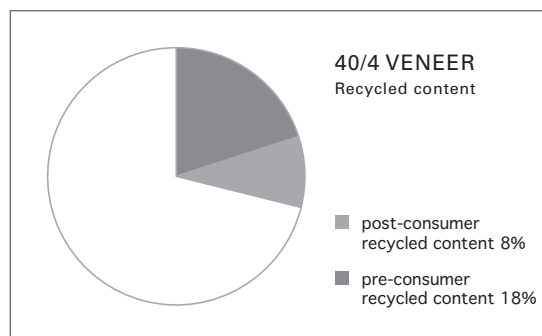

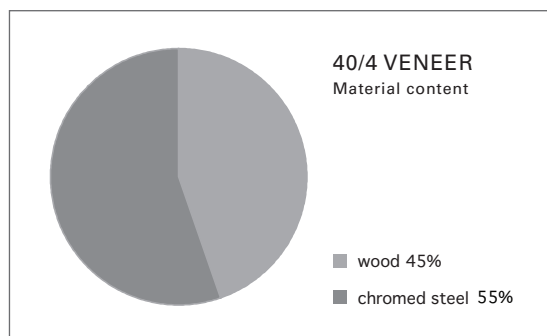

The 40/4 veneer is tested for emission of VOCs according to the ANSI/BIFMA M7.1-2007 and emits below the limit values of ANSI/BIFMA X7.1-2007. The 40/4 veneer therefore contributes to a healthy indoor climate.

THE VENEER

Wood is a renewable CO₂-neutral choice of material. This is backed by HOWE using green CO₂-neutral electrical energy only. What's more, the seat and back for the 40/4 in veneer are made from wood varieties which are all sourced from sustainable forestry.

A SUSTAINABLE FRAME

The steel frame contains a minimum of 40% recycled content. The frame is 100% recyclable.

The 40/4 veneer's recycled content breaks down to 8% post-consumer and 18% pre-consumer recycled content.

RECYCLABLE PACKAGING

The packaging materials used for the 40/4 include 94% corrugated cardboard and 6% polyethylene plastic sheets. This means that the packaging is 100% recyclable. The cardboard used for packaging is produced from up to 25% recycled materials, repeated recycling of the cardboard is possible. Additionally, the cardboard used as protection in between the frames during transport from our supplier to HOWE is returned to our supplier and used repeatedly.

Did you know...

- that the 40/4 is 100% recyclable at the end of the product's life?
- that the 40/4 in veneer contains no PVC, which goes for all HOWE products?
- that the 40/4 is a low VOC emitting product?
- that the 40/4 is space-saving and thus resource saving both during transport and use?
- that the 40/4 is a combination of timeless and durable design?
- that the 40/4 is cost efficient and replacements of components are easily manageable?
- that the 40/4 is easy to disassemble for recycling?
- that the 40/4 has a 10 year warranty?
