

TEMPEST

PRODUCT DESCRIPTION

THE ICON OF MULTI-FUNCTIONAL FLIP-TOP TABLES

Tempest is the original space-saving flip-top table system for use in multi-purpose eating, meeting, training and conferencing facilities. Whether you prefer a big conference table, a modular meeting table, a low lounge table or a high bar table, Tempest has an array of answers. With KOMPLOT Design's beautiful and rock solid flip-top mechanism stability is taken to a whole new level. In addition, the elegant elliptical leg-design with concealed castors makes Tempest easy for just one person to "wheel-barrow" around swiftly and effortlessly.

ENVIRONMENTAL AMBITIONS AND HEALTHY DECISIONS

Taking a genuine interest in our surroundings is far more than just a noble idea. It is deeply ingrained in HOWE's strategic thinking. Our long-lasting, space-optimising and multi-usage furniture solutions means fewer resources needed; and thus fewer effects on the environment. Thus, our strategic thinking also contributes to the overall LEED-credit.

We have summarised this mindset in the concept 'GREENTHINKING' which constantly reminds us to act responsibly vis-à-vis our surroundings, be it our business partners or the natural world.

FEATURES

SUPPLIERS

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

VOC

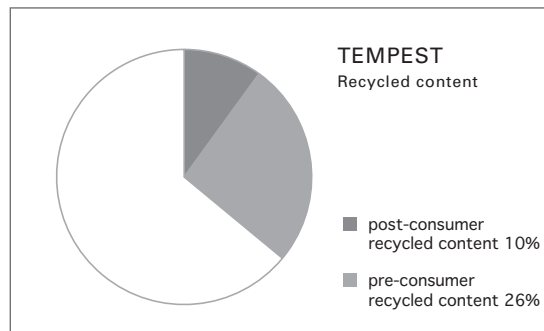

Tempest laminated tabletop emits less than 0.04 mg/m³ formaldehyde which is 69% below the limit value of the E1 standard. What's more, the Tempest laminated tabletop emits less than 5 µg/m³ of any other Volatile Organic Compound (VOC), and therefore Tempest ensures a healthy indoor air quality.

THE TABLE BASE

The Tempest table base is 100% recyclable at the end of the product's life. Zink components of the table base contain a minimum of 20% recycled content.

ALUMINIUM PARTS

All Tempest aluminium parts are produced from 90% recycled aluminium, which requires only 5% of the energy it would require to produce the parts from new aluminium.

Tempest is comprised of a minimum of 36% recycled materials. This breaks down to 10% post-consumer recycled content and 26% pre-consumer recycled content.

RECYCLABLE PACKAGING

The packaging materials used for Tempest include 94% corrugated cardboard and 6% polyethylene plastic sheets. This means that the packaging is 100% recyclable. The cardboard used for packaging is produced from up to 25% recycled materials and repeated recycling of the cardboard is possible.

Did you know...

- that Tempest is 41% recyclable at the end of the product's life?
- that Tempest contains no PVC, which goes for all HOWE products?
- that Tempest is space-saving and thus resource saving both during transport and use?
- that Tempest is a combination of timeless and durable design?
- that Tempest is cost efficient and replacements of components are easily manageable?
- that Tempest is easy to disassemble for recycling?
- that Tempest has a 5 year warranty?
