A unique semi gloss graphic texture on the back

Ø16 x 2 mm / Ø0.63" x 0.08" gauge steel tube. Strength without compromise to design

Ø11 mm / Ø0.4" gauge steel tube. Strength without compromise to design

Glides for floor protection

SixE is designed to be the most efficient, sturdy, and long-lasting solution to the ubiquitous stacking shell chair.

Created by British design duo Pearson Lloyd, it emphasizes both comfort and functionality, ensuring essential support and ergonomic benefits for an optimal seating experience. With a contemporary yet unassuming design, SixE seamlessly integrates with architectural spaces while enhancing their aesthetic appeal.

Universal in its application, the SixE family, comprising 4-leg and sled variants, enables the chair to function across various settings: from domestic contexts, cafes, educational and learning spaces to general office and inclusive meeting areas.

TESTING AND WARRANTY

- SixE is designed for severe contract use.
- The chair passed testing according to the required EN and BIFMA standards.
- SixE carries the HOWE 10 year warranty.

ERGONOMIC, EFFICIENT, ELEGANT, ENVIRONMENTAL, ECONOMIC AND EASE OF HANDLING: THESE SIX "E" WORDS SUM UP THE SIXE CHAIR.
