

The AS400 and AS500 tables are smart, mobile, and at a quality level that makes them stand out. Designed by the successful German designer Andreas Störiko, the AS tables meet the growing need for flexible spaces and agile processes, providing mobility and freedom to arrange work, study, and meeting set-ups at your will.

Due to their patented nesting ability and mobile castor base, the AS tables can be moved across the aisle, stacked into the storage room or into the lift by just one person.

The tables come with round and square tabletops but are especially characterized by the round top with a concave recess – called round concave – shaped tabletop which enables the tables to dock on and be linked together in an unlimited number of arrangements. The tables come in a standard café height and in bar height. They also can be flipped and nested when not in use.

They are part of a product family of nesting chairs and tables, called AS series.

#### TESTING AND WARRANTY

- The AS tables are designed for severe contract use and has been subject to a variety of tests to ensure its highest quality and durability.
- The tables are tested by third-party organizations and passed testing according to the required EN and BIFMA standards, staying also in line with strict emission regulations. All the certificates are available for access and download [here](#).
- All parts of the tables can be dismantled and recycled.
- The AS table bases are 89% (AS400) and 91% (AS500) recyclable at the end of the product's life.
- The AS tables have 10-year warranty.
