

THE TONGUE VENEER

HOWE

PRODUCT ENVIRONMENTAL PROFILE

DESIGNED BY ARNE JACOBSEN 1955

THE TONGUE VENEER

Arne Jacobsen's Tongue chair is a Danish design classic that went missing. Designed in 1955 right after the Ant chair, it was always one of his favorites but never really found a home. So, when the opportunity arose to take the Tongue classic under our wing at HOWE, we couldn't resist. The Tongue chair is a classic Arne Jacobsen design. It has the immediately recognizable characteristics of the organic wave-form in the seat; complemented with highly sculptural, splayed legs.

FEATURES

Learn more about HOWE and our Moving Sustainability initiatives here:

<https://www.howe.com/moving-sustainability>

SUPPLIERS

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

FSC®

All versions of the Tongue chair are FSC® certified as standard – the guarantee that the veneer origins from forests that have been managed in an environmentally-friendly, socially responsible and economically viable manner.

TRIVALENT CHROME PLATING

The standard chrome plating on the Tongue is trivalent chrome. Trivalent chromium is a more environmentally sound plating than the commonly used hexavalent chromium. When plating with trivalent chromium less chemicals are needed and certain health risks are avoided during manufacturing.

RESIN IDENTIFICATION

The plastic components of the Tongue are marked with ASTM (ISO 11469) resin identification codes whenever possible in order to facilitate correct sorting of components for recycling.

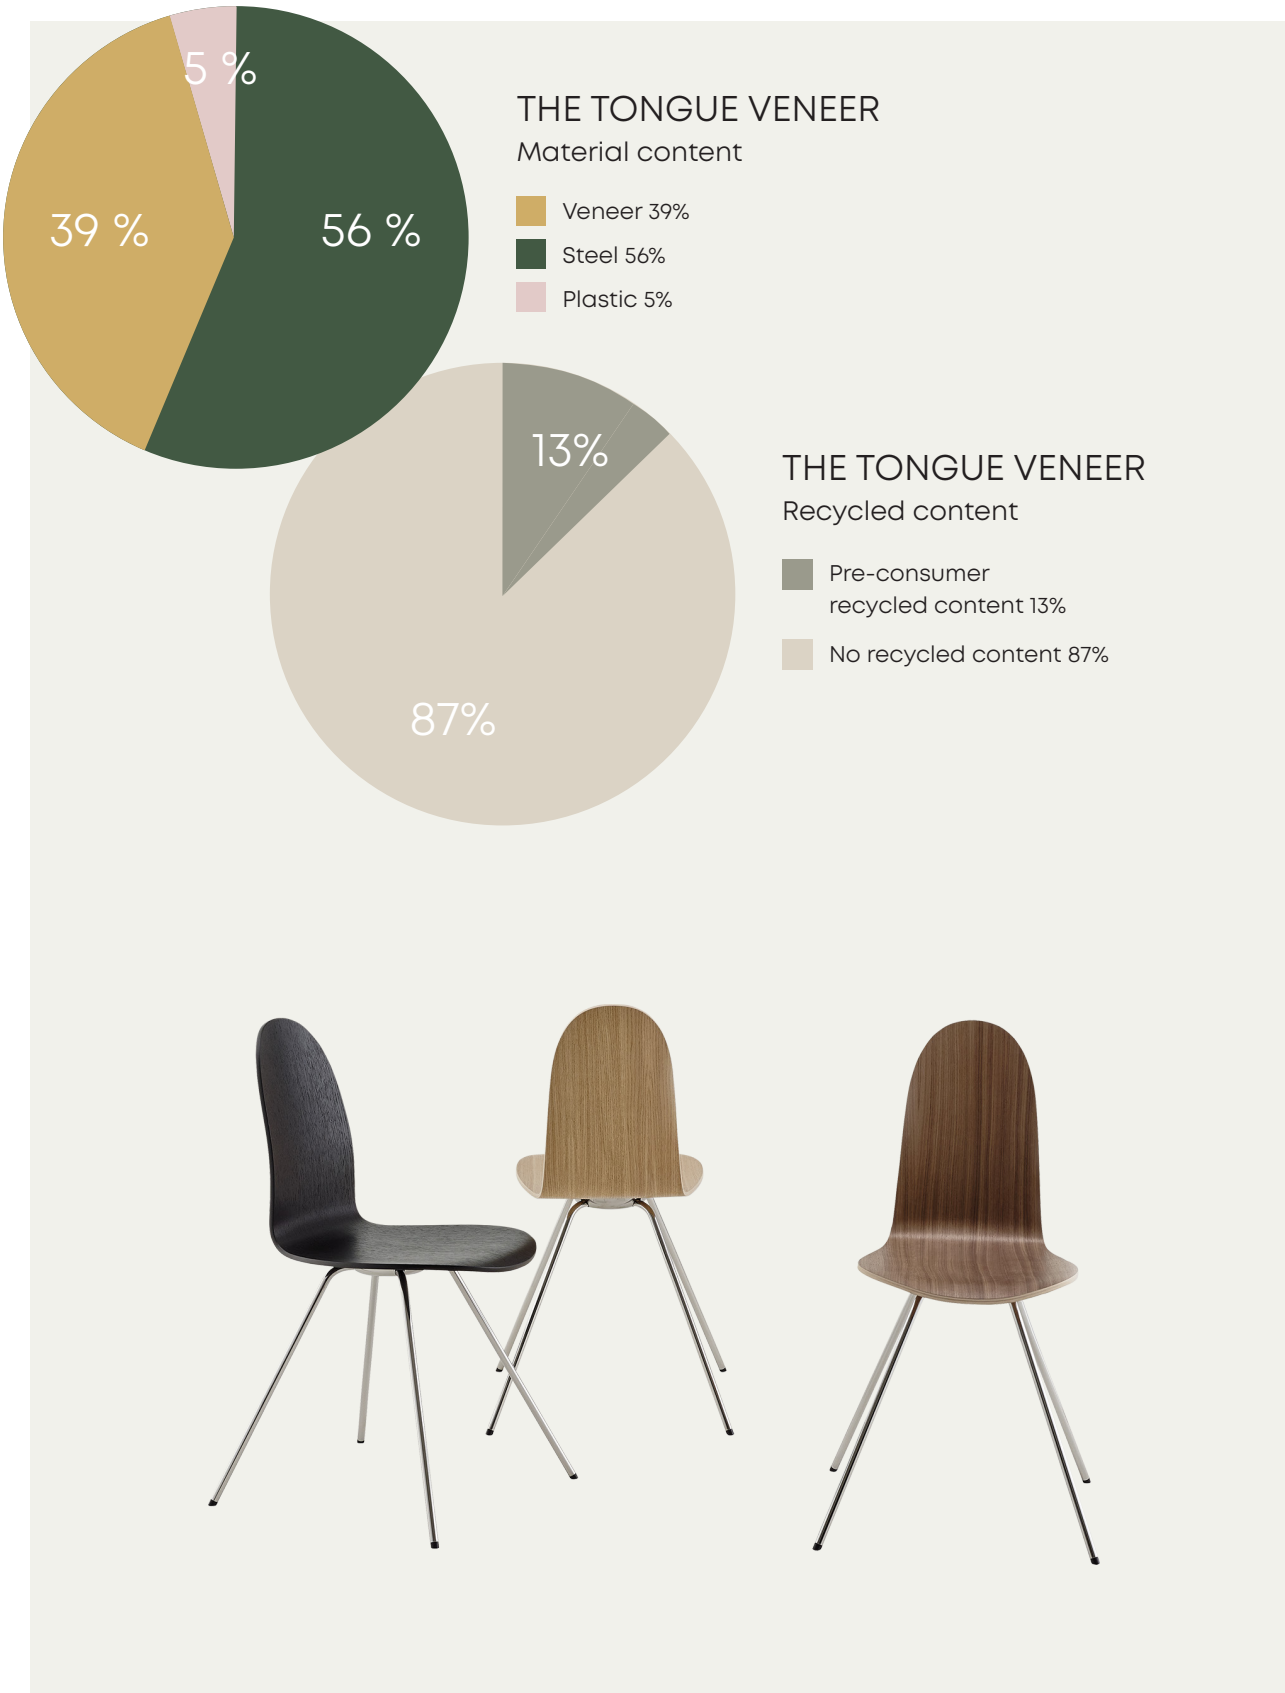

DESIGN FOR DISASSEMBLY

It is a fact that products assembled with complex assemblies or requiring multiple tools are not likely to be repaired or recycled. Therefore, the Tongue is cleverly designed to be disassembled by the use of a screwdriver only.

DID YOU KNOW THAT...

- the Tongue veneer is 95% recyclable at the end of the product's life?
- the Tongue is FSC® certified at no upcharge to customers?
- the Tongue contains no PVC, which goes for all HOWE products?
- the Tongue is a combination of timeless and durable design?
- the Tongue is cost efficient and replacements of components are easily manageable?
- the Tongue is easy to disassemble for recycling?
- the Tongue has a 5-year warranty?

Subject to ongoing changes and adjustments.
