ACCREDITATION

DECLARATION

This certificate represents a third-party assessment conducted per the ISO59040 and ISO14067 standards. The assessment is based upon independently published third-party data, Environmental Product Declarations and manufacturers' data. The assessment has been carried out using verified third party software and propriety software systems.

This certificate is marketed as a Circular Product Declaration and should be used to report the application of circular design application as set out in the dc Circular Design Guide.

Please note our data measurements rely on customer-provided data and industry-standard conversion factors, which may introduce a degree of estimation and assumption. While we take rigorous steps to review and validate the information, we cannot guarantee absolute precision, as data quality depends on the methodologies and data sources used by suppliers and customers. Our verification process includes design analysis using drawings and bills of materials by design specialists to verify claims.
