Munkegaard chair

Design by Arne Jacobsen 1955

www.howe.com/munkegaardchair

The Munkegaard chair, also known as the Mosquito chair, is a strong, bold original Arne Jacobsen design that demands attention. Functionality was a prerequisite for the Munkegaard chair. Originally designed in 1955 for the Munkegaard School, the chair is easily stackable and perfectly suited to home or office. It complements any décor, adding distinction, strength and charm, and making the statement of individuality it was always meant to. Thanks to our sophisticated engineering skills and construction techniques, we have been able to bring a 1950s original up-to-date, all without altering the aesthetics. We've made it greener and tougher than ever before, and turned it into what it is today: a new classic for the 21st century.

Description

The Munkegaard chair was introduced in 1955 at the Munkegaard School in Denmark. It was an archetypal Arne Jacobsen design: controversial, elegant and edgy. The Munkegaard chair remains just as eye-catching today, and at HOWE, we are extremely proud and honoured to be able to reintroduce the chair to the world.

Product details

VENEER VERSION

The surface veneer is in matt lacquered 0.02" knife-cut sanded veneer on both sides. The inner layers are in 0.04" rotary cut beech. The thickness of the shell is 0.39"-0.51".

Standard finishes: Oak and walnut veneer as well as black stained veneer.

Be aware that veneer is a natural material and differences may occur in structure and colours.

UPHOLSTERED VERSION

Full upholstery version and seat only upholstery available. On the seat only upholstery version the veneer is visible 0.59" all around the seat edge.

The upholstery is in fabric, trevira, microfibre, leather or PU. The back is fully upholstered. As standard, the cushioning is fire retardant CMHR polyurethane foam. Thickness is 0.39" on the front of the shell and 0.2" on the back of the shell. Foam density is 3.6 lb/ft³ on the back of the shell and 4.7 lb/ft³ on the front of the shell. Some fabrics are upholstered with use of 'wings' - a nice stitching on both edges of the bend in the lower back.

If upholstered chairs are to be stacked, customers should order the lose stacking pan to prevent stacking marks in the upholstery. The lose stacking pan has to be ordered separately.

FRAMES

The frame is a round steel tube (Ø0.55" x 0.08"). Frame finish comes in trivalent chrome (chrome₃) (min. 20 µ) or in black or white powder coating (min. 50 µ) as standard. The glides are in black TPE plastic.

Varieties

The Munkegaard chair is available as side chair, barstool and counter barstool.

LINKING

The side chair is available with a linking system called quick linking. This system will position the chairs. The system can be retrofitted and it is mounted underneath the seat. It is retractable and therefore completely invisible when not in use. The material consist of metal and POM - both in grey. This linking system is compatible with the seat pad available for Munkegaard and the linking does not conflict with the stackability.

Stacking capacity

The side chair in veneer is stackable up to 12 chairs in height of 49.8" on floor.

The side chair in veneer is stackable up to 20 chairs in height of 67.9" on dolly.

The upholstered side chair is stackable up to 8 chairs in height of 45.7" on floor.

The upholstered side chair is stackable up to 15 chairs in height of 66.1" on dolly.

The barstool in veneer is stackable up to 12 chairs in height of 62.4" on floor.

The upholstered barstool is stackable up to 8 chairs in height of 60.8" on floor.

The counter barstool in veneer is stackable up to 12 chairs in height of 56.7" on floor.

The upholstered counter barstool is stackable up to 8 chairs in height of 55.1" on floor.

REQUIRED FLOOR SPACE

Single dolly = 20 chairs = 5.27 sq. ft floor space.

WEIGHT

Chair, veneer version: 8.8 lb.

Chair, upholstered version: 9.7 lb.

Barstool, veneer version: 12.3 lb.

Barstool, upholstered version: 13.2 lb.

Accessories

TRANSPORT DOLLY with capacity of 20 veneer side chairs per unit. Single dolly with handle (41 lb).

STACKING PAN for protection when stacking upholstered chairs. The stacking pan is loose and in polyamide.

Ergonomics & environment

The chairs triple curved form moulds to body's natural contours. The waterfall shell design does not restrict blood circulation and so prevents undue pressure under the thighs. The shells, frames, and chroming are all produced according to ISO14001 standards. The chair is FSC certified and the chrome is trivalent chrome (chrome3). All parts of the chair can be dismantled and recycled.

Tests

The chair has been tested to EN 16139:2013, level 2 for stability, strength, and durability, as well as the ANSI/BIFMA X5.1 test.

Warranties

HOWE a/s gives a 5 years guarantee on all Munkegaard chairs against weld break-ages, defective material, workmanship and performance under normal use. For full information please see the warranty provision on howe.com.
